

BRAIN BOOST AUSTRALIA

Learn how the brain learns best through three 20 hour micro credentials, on-line through CQ University. Professor Ken Purnell and Dr Judi Newman have combined their expertise and written the short courses to capture the neuroscience of learning for the professional teacher, coach or trainer. These courses are available to the public.

Teachers can undertake the 3 courses in their own time for \$95 each.

Outcome on successful completion

- Certificate of completion
- Digital badge
- Awarded continuing professional development (CPD) hours

How to apply:

URLs to access the micros:

- [PDC134346: Novice vs Expert Learners – Neuroplasticity](#)
- [PDC134347: How the Brain Learns, Retains and Masters Information](#)
- [PDC134348: Neuromyths](#)

To purchase this micro-credential

Visit the website [Novice vs Expert Learners – Neuroplasticity](#) and complete the following steps:

1. Go to "How to Apply"
2. Add this micro-credential (and others) to a shopping cart 
3. Login or establish your account if you don't already have one

Links and opportunities

Professor Purnell states that the 'Brain and Learning' is a required Professional Standard from 2026 by AITSL for Australian teachers. He is a world leader in the neuroeducation field and offers a Master of Educational Neuroscience for those professionals who want to extend their learning after they complete the micro credentials. Another opportunity is to invite Dr Judi Newman to your school to offer face to face workshops and interactive activities for a deep dive into the neuroscience of learning.
